THANK YOU FOR ORDERING

Prior to use: Please follow these instructions for proper handling and storage

1 OPEN BOX AND EVALUATE APLIGRAF®

- After removing the polybag from the shipping box, turn over the polybag and check the pH of the agarose gel using the affixed color-coded pH chart (as shown in the picture).

- Check the expiration date. If the product has expired, is out of pH range, or if there is any evidence of damage to the product, call 1-888-HEAL-2-DAY (Option 1) to arrange replacement. DO NOT OPEN OR USE.

- The polybag should not be opened until the physician is ready to apply APLIGRAF® to the patient.

(Note: APLIGRAF® must be used within 15 minutes of opening the polybag.)

2 STORE UNTIL USE

- DO NOT REFRIGERATE.

- Keep the package insert with the polybag.

- Keep APLIGRAF® in its shipping container (closed) at a controlled room temperature of 68°F to 73°F (20°C to 23°C) until ready for application.

(Note: The shipping container is the best place to store APLIGRAF®.)

Visit www.APLIGRAF.com for additional information about Apligraf®
